WATERGATE'S SECRETS AND BETRAYALS

ORCHESTRATING NIXON'S DEMISE

On the fiftieth anniversary of the resignation of President Richard Nixon, "Watergate Secrets and Betrayals" unveils the hidden, secret documents behind America's most infamous political scandal.

Narrated by actor John O'Hurley and based on the groundbreaking research of former White House lawyer Geoff Shepard, this documentary is set to change everything we were told about Watergate.

Irrefutable evidence will be presented to the public, connecting the dots between the three branches of government and the scandal that shattered Nixon's landslide re-election, forced his resignation, and led to the downfall of at least twenty members of his administration.

Nixon and his closest aides went to their graves with the indelible stain of disgrace—never knowing the full extent of the lies and deceit that voided the 1972 victory.

Every American must see this—how Watergate judges and prosecutors abused their power to bring down a president. Only by understanding what they did can we prevent this from happening again.
