

# New American

Inspired by Robert Welch's "New Americanism" essay, first published in 1956, The New American Magazine is printed twice a month as well as a digital daily news source whose reliability has never necessitated a retraction.

This news source does an excellent job of covering the far reaching ramifications of a One World Government and its effects on US sovereignty and one's inalienable rights in all aspects of life from education, health care, religion, to one's livelihood. <https://thenewamerican.com/>
